

Shubhangi Handa

Snohomish, WA • shubhihanda@gmail.com • 425-419-9750 • [LinkedIn](#) • [Portfolio](#)

UX/Product Designer with experience in design operations, service design, user research, and AI-enabled product experiences.

Strong foundation in prototyping, mixed-methods research, product thinking, and cross-functional collaborations.

SKILLS & TOOLS

Design: Customer Experience, Service Design, Wireframing, Prototyping, User Flows, Design Systems, Figma, Miro, Canva, Framer, Lovable

Product & Ops: Design Operations, Process Improvement, Stakeholder Management, Documentation Strategy, Confluence, Airtable, Jira

UX Research: User Interviews, Usability Testing, A/B Testing, Surveys, Competitive Analysis, Affinity Mapping, Heuristic Evaluation, User Personas, Journey Mapping, Card Sorting

Technical: HTML, CSS, JavaScript, React, Firebase, Flask, Python

EDUCATION

University of Washington, Information School

Master of Science in Information Management: User Experience

Seattle, WA

Sept 2025 – June 2026

University of Washington, Information School – Annual Dean's List

Seattle, WA

Bachelor of Science in Informatics: Biomedical and Health Informatics

June 2025

Relevant Coursework: Research Methods • Design Methods • Client-Side Development

WORK EXPERIENCE

Centene Corporation, Graduate Design Operations Intern | Remote, Snohomish

June 2026 – Present

- Led current-state ecosystem mapping for Design Ops at a **Fortune 19** healthcare company, documenting relationships across **5+** teams, **10+** operational processes, and **6** enterprise tools to identify workflow and UX improvement opportunities
- Designed and published **3+** Confluence documentation experiences, improving accessibility and discoverability of operational resources for designers and stakeholders
- Created documentation and adoption communications for an AI-powered design review notetaking initiative, clarifying guidance for design review participants

Center for Learning, Computing, and Imagination, Research Assistant | Seattle, WA

June 2025 – June 2026

- Conducted user research with **17** adolescent participants through workshops, observations, and interactive AI activities to evaluate Promptinator, a web-based image generation tool
- Analyzed **100+** qualitative artifacts using thematic coding to identify usability challenges in Promptinator's interface, translating findings into redesign recommendations for youth-centered AI interaction
- Co-authored research paper on design recommendations, accepted to **ACM Interaction Design and Children (IDC) 2026**

Peak Mojo, UX Research Intern | Bellevue, WA

July 2025 – Jan 2026

- Redesigned **2** landing pages end-to-end, from wireframes through high-fidelity Framer prototypes, restructuring information hierarchy and CTAs
- Conducted competitive analyses across **5+** platforms, translating findings into design requirements that addressed feature gaps and drove **30%** feature adoption among active users
- Analyzed user search behavior and site analytics to inform IA strategy, improving search rankings for **5+** target keywords

Tech Guides Blog, UI/UX Design Intern | Remote, Snohomish

July 2025 – Sept 2025

- Designed a cyberpunk-themed UI component library in Figma, including breadcrumb navigation and dropdown menu components across **3+** interaction states (default, hover, expanded, selected), for video game developer handoff
- Presented component designs in a design review with **4** stakeholders, incorporating feedback to refine visual consistency and interaction states before handoff

PROJECTS

FitList, Product Design & UX Research

Spring 2026

- Created **2** customer journey maps, service blueprints, and hi-fi prototypes to align digital and in-store touchpoints
- Led end-to-end UX: research, journey mapping, personas, storyboarding, and Lovable prototyping
- Iterated on community features through user testing, landing on a Pinterest-style lookbook with a private friends layer

Tailored, Product Design & UX Research

Autumn 2025

- Led UX research and interaction design on a **4-person** team, including contextual interviews, competitive analysis, and usability testing to uncover opportunities for reducing decision fatigue in apparel shopping
- Created user journeys, affinity diagrams, and interactive prototypes to streamline outfit planning and thrift discovery
- Conducted **5** usability tests to validate design decisions, improving users' confidence and efficiency when selecting outfits

Instagram Terms of Service (ToS) Redesign, Product Design & UX Research

Spring 2026

- Designed and evaluated a transparency-focused ToS prototype with **5 users**, improving clarity through plain-language
- Conducted a mixed-methods study with **30** participants, combining observation, surveys, and thematic analysis to identify barriers to ToS comprehension
