TECHNICAL SKILLS

Design & Prototyping: Figma, Miro, Framer, Wireframing, Design Systems, Lo/Hi-Fi Prototyping, HTML/CSS/React/JavaScript

UX Research: User Interviews, Usability Testing, Journey Mapping, Competitive Analysis, Affinity Mapping, User Personas

Design Ops & Collaboration: Confluence, Airtable, Azure DevOps, Jira, Process Documentation, Stakeholder Management

EDUCATION

University of Washington, Information School

Seattle, WA

Master of Science in Information Management: User Experience

June 2026

University of Washington, Information School – Annual Dean's List

Seattle, WA

Bachelor of Science in Informatics: Biomedical and Health Informatics

June 2025

Relevant Coursework: Design Methods, Client-Side Development, Data Visualization Design, Design Methods for Interactive Systems, Design Systems for Digital Experiences, Designing Information Experiences, Qualitative and Design Methods

WORK EXPERIENCE

Centene Corporation, Remote

June 2026 – Sept 2026

Design Operations Intern

- Owned current-state ecosystem mapping and stakeholder interviews across **6** design disciplines (UX, Design Ops, Accessibility, Design Systems, Research, Leadership) to surface knowledge documentation and governance inconsistencies
- Independently architected a Digital Design Operating Model in Miro, restructuring a fragmented knowledge base into **4** organized branches and publishing documentation experiences to improve discoverability for stakeholders in Confluence
- Validated the redesigned information architecture through **3** usability tests, then defined process governance standards and reusable UX and Design Process templates to sustain adoption after rollout
- Led the internal launch of a new AI note-taking process in Airtable for design reviews, translating backend pipeline logic into a rollout strategy that drove adoption across the design team, leading to a **60%** increase in design review efficiency

Center for Learning, Computing, and Imagination, Seattle, WA

June 2025 – June 2026

Research Assistant

- Co-authored a paper accepted to **ACM Interaction Design and Children (IDC) 2026**
- Ran mixed-methods UX research with **17** adolescent participants through workshops and interactive AI activities to evaluate Promptinator, a web-based AI image-generation tool, for interface and interaction design issues
- Thematically coded 100+ qualitative artifacts to surface recurring usability patterns, translating findings into concrete redesign recommendations for the tool
- Quantified coded qualitative responses in Google Sheets using COUNTIF and frequency calculations, then built stacked bar chart visualizations and LaTeX-formatted tables for a forthcoming co-authored manuscript

Peak Mojo, Bellevue, WA

July 2025 – Jan 2026

UX Researcher

- Redesigned **2** landing pages in Framer, owning micro-interactions across breakpoints to strengthen visual flow
- Ran competitive analyses across **5** platforms, translating findings into design requirements that closed feature gaps
- Designed a conversational AI hiring assistant experience, mapping workflows across **3** user types and architecting a **6-step** system prompt flow with adaptive tone
- Ran **10** scenario simulations testing onboarding clarity and bias-aware evaluation, defining success metrics for iteration

Tech Guides Blog, Remote

July 2025 – Sept 2025

UI/UX Design Intern

- Designed breadcrumb navigation and dropdown menu components in Figma across **4** interaction states (default, hover, expanded, selected), contributing to a shared cyberpunk-themed UI component library for a video game
- Presented components in a design review with **4** stakeholders, incorporating feedback to refine visual consistency with the rest of the library ahead of handoff

PROJECTS

FitList, Product Design & UX Research

Spring 2026

- Owned end-to-end UX design: research, journey mapping, personas, and Lovable prototyping, creating service blueprints and hi-fi prototypes to align digital and in-store touchpoints
- Iterated on community features through user testing, landing on a Pinterest-style lookbook with a private friends layer

Tailored, Product Design & UX Research

Autumn 2025

- Led UX Design and research on a 4-person team, using contextual interviews and competitive analysis to uncover opportunities for reducing decision fatigue in apparel shopping
- Validated design decisions through 5 usability tests, improving users' confidence and efficiency when selecting outfits
